Installation & Operation Guide

Joseph 1lt Wall light Antique Brass

3732596

WARNINGS

This unit has been designed and built according to international safety standards. These warnings are given for safety reasons and must be carefully follow.

Please read these instructions carefully and retain this document.

- Install in accordance with the current IEE Wiring Regulations and current Building Regulations.
- Ensure another person cannot restore electrical supply without your knowledge.
- If in doubt installation should be carried out by a registered electrician and an Electrical Installation Certificate must be issued for work carried out.
- Always shut off power to the circuit before starting installation work.
- Only use the Bulb Wattage recommended by the label on the lamp holder or lower. Never Exceed Recommended Wattage.
- When changing a bulb, switch off at mains, allow bulb 15-20 minutes to cool before handling. Dispose of used bulbs in accordance with local regulations.
- This product is suitable for indoor use only and place out of direct sunlight.
- Laura Ashley work hard with some of the best suppliers available to be sure that the quality of our product does not disappoint. Please inspect the unit before installation and speak to customer services if there is an issue. Issues are more difficult to rectify once the unit is installed.
- The glass shade is fragile; the edges will chip easily if they come into contact with other surfaces.
- Please clean using a damp cloth, do not use abrasive cleaners or multi-purpose sprays, they may affect the finish.

Installation

- This is a Class I product and must be connected to an earth circuit.
- Ensure the house electricity supply is switched off at the fuse board.
- If replacing an existing fitting note down or photograph the existing wiring arrangement before disassembling for reference.
- Ensure that the bracket supplied is fixed to the wall which will support the weight of the fitting.
- Install mounting bracket first – ensure the screws and raw plugs used are correct.
- Connect cables or terminals as shown.
- Check all wires are tight in the terminal block and no loose strands are left out. Cover with insulating tape.
- Replace insulation sleeve before closing connection block.
- Attach wall light to bracket and secure with the screws from both sides.
- Carefully release the product until the bracket takes the weight. Check and if necessary re-tighten screws.
- Carefully slide the glass shade over the bulb and lamp holder assembly.
- If in doubt at any time stop and consult a professional tradesman
