WARNINGS

This unit has been designed and built according to international safety standards. These warnings are given for safety reasons and must be carefully follow.

Please read these instructions carefully and retain this document.

- Install in accordance with the current IEE Wiring Regulations and current Building Regulations.
- Ensure another person cannot restore electrical supply without your knowledge.
- If in doubt installation should be carried out by a registered electrician and an Electrical Installation Certificate must be issued for work carried out.
- Always shut off power to the circuit before starting installation work.
- Only use the Bulb Wattage recommended by the label on the lamp holder or lower. Never Exceed Recommended Wattage.
- When changing a bulb, switch off at mains, allow bulb 15-20 minutes to cool before handling. Dispose of used bulbs in accordance with local regulations.
- This product is suitable for indoor use only and place out of direct sunlight.
- Laura Ashley work hard with some of the best suppliers available to be sure that the quality of our product does not disappoint. Please inspect the unit before installation and speak to customer services if there is an issue. Issues are more difficult to rectify once the unit is installed.
- The rods are fragile; the edges will chip easily if they come into contact with other surfaces.
- Rods to be hand tightened.
- Please clean using a damp cloth, do not use abrasive cleaners or multi purpose sprays, they may affect the finish.

Specification

	300 lm
LED	4-8W
CFL	8-9W
Halogen	28W
Suitable for Use with Dimmer	No
Weight	5.50kgs

Installation

- This is a Class I product and must be connected to an earth circuit.
- The weight of this product must be supported by the supplied chain and not the flex.
- Adjust the chain to the required length, pull though the excess flex ensuring that no strain is placed on flex.
- If replacing an existing fitting note down or photograph the existing wiring arrangement before disassembling for reference.
- Mount into a beam, check beam and ceiling for any weakness before beginning installation.
- Install mounting bracket first – ensure the screws and raw plugs used are correct and good quality.
- Connect wiring using provided connection block.
- Replace insulation sleeve before closing connection block.
- Position ceiling rose over mounting bracket and attach using provided screws.
- Carefully lower the product until the bracket and ceiling rose take the weight. Check and if necessary re-tighten screws.
- If in doubt at any time stop and consult a professional tradesman
