one LIGHT

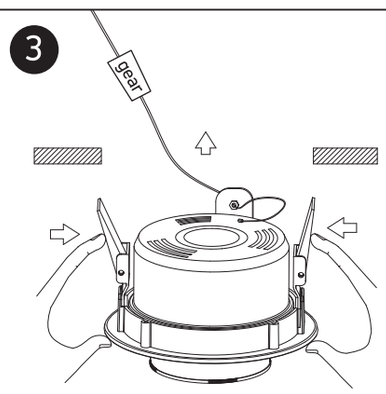

1

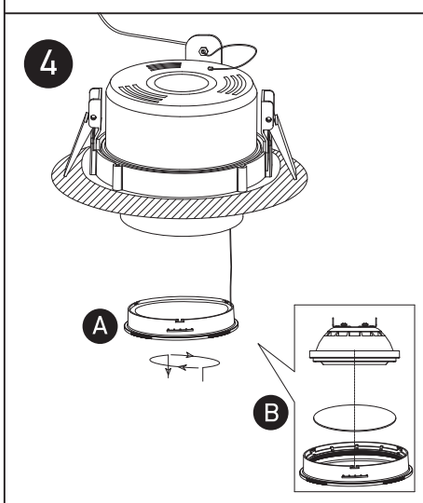

CUTOUT HOLE: 185mm

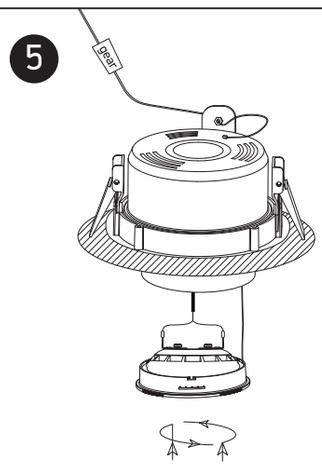

A. Remove the cardboard from the fitting before installation.
B. Connect the fitting to the gear (12V AC electronic transformer or 12V DC LED driver depending on the type of lamp used) and the gear to the mains.

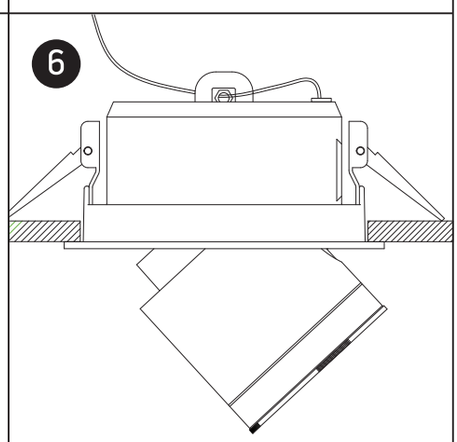

Fix the fitting on the ceiling by pushing the springs backward.

A. After the product is fixed, remove the ring by rotating counter clockwise.
B. Fix the lamp on the ring

Push the ring inside with the lamp and rotate it clockwise to lock it.

Check that fitting is installed properly and turn ON the power from the mains.

Warnings:

1. Make sure that the product is installed properly before connecting to electricity.
2. Do not cover the fitting.
3. Maintenance and installation should only be carried out by a professional electrician.
