BODENN

The Bodenn is a robust, mains operated ground light which is constructed from marine grade stainless steel (316) and is IP67 rated, making it ideal for coastal areas. The plastic exterior is to be fitted into the ground and then the light simply screws in on top. It is ideal for lighting up paths and driveways. Can also be used as a decking light without using the plastic casing.

HOXTON

The Hoxton is a recessed ground light made from stainless steel with a glass diffuser and benefits from having intergrated LED. This strong and sturdy fitting is IK08 and IP67, meaning it can withstand the elements. It also boasts an adjustable light head, allowing for it to be tilted outside the can and ensure precise light projection.
